

EuroVis 2018
Eurographics / IEEE VGTC Conference on Visualization 2018

Brno, Czech Republic

June 4 – 8, 2018

Organized by

EUROGRAPHICS
THE EUROPEAN ASSOCIATION
FOR COMPUTER GRAPHICS

IEEE Visualization and Graphics Technical Committee

General Chair

Barbora Kozlikova, Masaryk University, Brno, Czech Republic

Full Papers Chairs

Jeffrey Heer, University of Washington, USA

Heike Leitte, TU Kaiserslautern, Germany

Timo Ropinski, Ulm University, Germany

STARs Chairs

Robert S. Laramée, Swansea University, UK

G. Elisabeta Marai, University of Illinois at Chicago, USA

Michael Sedlmair, Jacobs University, Bremen, Germany

Short Papers Chairs

Jimmy Johansson, Linköping University, Sweden

Filip Sadlo, Heidelberg University, Germany

Tobias Schreck, Graz University of Technology, Austria

Posters Chairs

Anna Puig, Universitat de Barcelona, Spain

Renata Raidou, TU Wien, Austria

Gold Sponsors

Silver Sponsors

Bronze Sponsor

Non-Profit Sponsor

Preface

EuroVis 2018, the 20th Eurographics / IEEE VGTC Conference on Visualization, was held in Brno, Czech Republic, on June 4-8, 2018. The proceedings are published as a special issue of the Eurographics Computer Graphics Forum journal. The conference, which started in 1990 as the Eurographics Workshop on Visualization in Scientific Computing and was called VisSym after 1999, has been known as EuroVis since 2005. EuroVis attracts contributions that broadly cover the field of visualization. Topics include visualization techniques for spatial data, such as volumetric, tensor, and vector field datasets, and for non-spatial data, such as graphs, text, and high-dimensional datasets. EuroVis also covers the theory of visualization, hardware acceleration, large datasets, perception, interaction, user studies, information visualization, visual analytics, and many application areas of visualization.

After the submission deadline in early December 2017, 162 manuscripts were reviewed in a two-stage process that resulted in 47 accepted papers and an acceptance rate of 29.0%. During the first review cycle, each paper was reviewed by at least four reviewers. The 83 primary and secondary reviewers were members of the International Program Committee (IPC) and each selected at least one additional tertiary reviewer from outside the IPC. The IPC meanwhile represents the global visualization community quite well, including members from Australia, Brazil, Asia, US, and Europe. The IPC at EuroVis is a rather dynamic committee with regular rotations after a three-year period. The review process was double-blind for tertiary reviewers: only the members of the IPC and the chairs knew the identity of the authors. A great effort was made to identify and prevent conflicts of interest at all levels, and all reviewers were asked to read and agree to the IEEE Visualization and Graphics Technical Committee (VGTC) ethics guidelines. After all the reviews were completed, the primary reviewer led an online discussion among all reviewers and was responsible for writing a summary review and recommendation. These discussions were lively, significantly helping to find a consensus. Based on the reviewers' recommendations, the individual reviews, the online discussions, and after a thorough deliberation by the paper chairs, 47 papers were conditionally accepted. Two additional papers were deemed to have substantial potential after major revisions, and were invited for a fast-track review process to Computer Graphics Forum for possible publication in a future issue. In the second review cycle, the revised papers were again carefully reviewed by the primary reviewers, and due to the significant improvements all 47 were finally accepted for publication. We helped to shape the reviews to be as constructive as possible to also provide the authors of rejected papers with substantial feedback for their further research.

We are thankful to everybody who helped to make the event possible. We thank the IPC members for their careful and timely work in all stages of the reviewing process and the tertiary reviewers for providing in-depth assessments of the submissions. We thank our invited speakers Drew Berry and Daniel Šýkora. We thank the chairs of the short paper track, Jimmy Johansson, Filip Sadlo, Tobias Schreck, the chairs of the STARS, Robert S. Laramée, G. Elisabeta Marai, Michael Sedlmair, and the chairs of the Posters track, Anna Puig, Renata Raidou, for their great efforts in their corresponding tracks that make EuroVis such a successful conference. We also thank all the chairs of the co-located workshops, and Stefanie Behnke, who has been very helpful throughout all the process of publication of this journal. We also would like to thank the authors of all submitted papers and all conference attendees. Finally, a special thanks goes to Barbora Kozlikova, for the entire organization of EuroVis 2018.

International Programme Committee

Gennady Andrienko, Fraunhofer Institute IAIS, Germany
Fabian Beck, University of Duisburg-Essen, Germany
Harsh Bhatia, Lawrence Livermore National Laboratory, United States
Rita Borgo, Kings College London, United Kingdom
Timo Bremer, Lawrence Livermore National Laboratory, United States
Roxana Bujack, Los Alamos National Laboratory, United States
Michael Burch, Eindhoven University of Technology, Netherlands
Nan Cao, Tongji University, China
Min Chen, University of Oxford, United Kingdom
Wei Chen, Zhejiang University, China
Joao Comba, UFRGS, Brazil
Balázs Csébfalvi, Budapest University of Technology and Economics, Hungary
Stephan Diehl, Trier University, Germany
David Ebert, Purdue University, United States
Alex Endert, School of Interactive Computing, Georgia Tech, United States
Alireza Entezari, University of Florida, United States
Jean-Daniel Fekete, Inria, Saclay, France
Carla Freitas, UFRGS, Brazil
Issei Fujishiro, Keio University, Yokohama, Japan
Kelly Gaitner, University of Texas at Austin, United States
Enrico Gobetti, CRS4, Italy
Eduard Gröller, TU Wien, Austria
Carsten Görg, University of Colorado, United States
Markus Hadwiger, KAUST, Saudi Arabia
Lane Harrison, WPI, United States
Helwig Hauser, University of Bergen, Norway
Hans-Christian Hege, Zuse Institute Berlin, Germany
Bernd Hentschel, Aachen University, Germany
Mario Hlawitschka, University of Applied Sciences Leipzig, Germany
Tobias Isenberg, Inria, Saclay, France
Alark Joshi, University of San Francisco, United States
Daniel Keim, University of Konstanz, Germany
Jessie Kennedy, Edinburgh Napier University, United Kingdom
Andreas Kerren, Linnaeus University, Sweden
Steffen Koch, University of Stuttgart, Germany
Jörn Kohlhammer, Fraunhofer IGD, Germany
Robert Kosara, Tableau Research, Seattle, United States
Michael Krone, University of Stuttgart, Germany
Jens Krueger, University Duisburg-Essen, Germany
Kai Lawonn, University of Koblenz - Landau, Germany
Lars Linsen, Westfälische Wilhelms-Universität Münster, Germany
Zhicheng Liu, Adobe Research, United States
Ross Maciejewski, Arizona State University, United States
Silvia Miksch, TU Wien, Austria

International Programme Committee

Rosane Minghim, University of Sao Paulo, Brazil
Gabriel Mistelbauer, Otto-von-Guericke University Magdeburg, Germany
Kenneth Moreland, Sandia National Laboratories, United States
Klaus Müller, Stony Brook University, United States
Vijay Natarajan, Indian Institute of Science, India
Luis Gustavo Nonato, ICMC-USP / CDS-NYU, University of Sao Paulo, Brazil
Steffen Oeltze-Jafra, University of Leipzig, Germany
Renato Pajarola, University of Zürich, Switzerland
Bernhard Preim, Otto-von-Guericke University, Germany
Huamin Qu, The Hong Kong University of Science and Technology, Hong Kong
Christof Rezk-Salama, Universität Siegen, Germany
Gerik Scheuermann, Leipzig University, Germany
Han Wei Shen, The Ohio State University, United States
Veronika Soltészova, Christian Michelsen Research, Norway
Shigeo Takahashi, University of Aizu, Japan
Alexandru Telea, University of Groningen, Netherlands
Holger Theisel, University of Magdeburg, Germany
Cagatay Turkay, University of London, United Kingdom
Anna Vilanova Bartoli, Delft University of Technology, Netherlands
Tatiana von Landesberger, TU Darmstadt, Germany
Manuela Waldner, TU Wien, Austria
Bei Wang, Scientific Computing and Imaging Institute, United States
Chaoli Wang, University of Notre Dame, United States
Michel Westenberg, Eindhoven University of Technology, Netherlands
Thomas Wischgoll, Wright State University, United States
Jing Yang, UNCC, Charlotte, United States
Hongfeng Yu, University of Nebraska-Lincoln, United States
Jiawan Zhang, Tianjin University, China

TABLE OF CONTENTS

Multiple Fields and Time

- Hierarchical Correlation Clustering in Multiple 2D Scalar Fields* 1
Tom Liebmann, Gunther H. Weber, and Gerik Scheuermann
- Representative Consensus from Limited-Size Ensembles* 13
Mahsa Mirzargar and Ross T. Whitaker
- Time Lattice: A Data Structure for the Interactive Visual Analysis of Large Time Series* 23
Fabio Miranda, Marcos Lage, Harish Doraiswamy, Charlie Mydlarz, Justin Salamon, Yitzchak Lockerman, Juliana Freire, and Claudio T. Silva
- Key Time Steps Selection for Large-Scale Time-Varying Volume Datasets Using an Information-Theoretic Storyboard* 37
Bo Zhou and Yi-Jen Chiang

Comparative and Collaborative

- ChangeCatcher: Increasing Inter-author Awareness for Visualization Development* 51
Mona Hosseinkhani Loorak, Melanie Tory, and Sheelagh Carpendale
- Towards Easy Comparison of Local Businesses Using Online Reviews* 63
Yong Wang, Hammad Haleem, Conglei Shi, Yanhong Wu, Xun Zhao, Siwei Fu, and Huamin Qu
- Chart Constellations: Effective Chart Summarization for Collaborative and Multi-User Analyses* 75
Shenyu Xu, Chris Bryan, Jianping Kelvin Li, Jian Zhao, and Kwan-Liu Ma
- Visualizing Expanded Query Results* 87
Michael Mazurek and Manuela Waldner

High-dimensional Data

- Interactive Visual Exploration of Local Patterns in Large Scatterplot Spaces* 99
Mohammad Chegini, Lin Shao, Robert Gregor, Dirk Joachim Lehmann, Keith Andrews, and Tobias Schreck
- Fast and Accurate CNN-based Brushing in Scatterplots* 111
Chaoran Fan and Helwig Hauser
- Towards User-Centered Active Learning Algorithms* 121
Jürgen Bernard, Matthias Zeppelzauer, Markus Lehmann, Martin Müller, and Michael Sedlmair

Visualization Design

- Exploring the Visualization Design Space with Repertory Grids* 133
Kuno Kurzhals and Daniel Weiskopf
- Design Factors for Summary Visualization in Visual Analytics* 145
Alper Sarikaya, Michael Gleicher, and Danielle Albers Szafir
- Assessing Effects of Task and Data Distribution on the Effectiveness of Visual Encodings* 157
Younghoon Kim and Jeffrey Heer
- The Perception of Graph Properties in Graph Layouts* 169
Utkarsh Soni, Yafeng Lu, Brett Hansen, Helen C. Purchase, Stephen Kobourov, and Ross Maciejewski

TABLE OF CONTENTS

Medical Visualization

- Explorative Blood Flow Visualization using Dynamic Line Filtering based on Surface Features* 183
Benjamin Behrendt, Philipp Berg, Oliver Beuing, Bernhard Preim, and Sylvia Saalfeld
- Visual and Quantitative Analysis of Great Arteries' Blood Flow Jets in Cardiac 4D PC-MRI Data* 195
Benjamin Köhler, Matthias Grothoff, Matthias Gutberlet, and Bernhard Preim
- Bladder Runner: Visual Analytics for the Exploration of RT-Induced Bladder Toxicity in a Cohort Study* 205
Renata Georgia Raidou, Oscar Casares-Magaz, Aleksandr Amirkhanov, Vitali Moiseenko, Ludvig P. Muren, John P. Einck, Anna Vilanova, and Eduard Gröller

Structure and Shape

- ConcaveCubes: Supporting Cluster-based Geographical Visualization in Large Data Scale* 217
Mingzhao Li, Farhana Choudhury, Zhifeng Bao, Hanan Samet, and Timos Sellis
- Hypersliceporer: Interactive Visualization of Shapes in Multiple Dimensions* 229
Thomas Torsney-Weir, Torsten Möller, Michael Sedlmair, and R. Mike Kirby
- Exploring High-Dimensional Structure via Axis-Aligned Decomposition of Linear Projections* 241
Jayaraman J. Thiagarajan, Shusen Liu, Karthikeyan Natesan Ramamurthy, and Peer-Timo Bremer

Embeddings

- Interactive Analysis of Word Vector Embeddings* 253
Florian Heimerl and Michael Gleicher
- PixelSNE: Pixel-Aligned Stochastic Neighbor Embedding for Efficient 2D Visualization with Screen-Resolution Precision* 267
Minjeong Kim, Minsuk Choi, Sunwoong Lee, Jian Tang, Haesun Park, and Jaegul Choo
- Visualizing Multidimensional Data with Order Statistics* 277
Mukund Raj and Ross T. Whitaker

Vector and Tensor Fields

- Visualizing the Phase Space of Heterogeneous Inertial Particles in 2D Flows* 289
Irene Baeza Rojo, Markus Gross, and Tobias Günther
- Visualization of 4D Vector Field Topology* 301
Lutz Hofmann, Bastian Rieck, and Filip Sadlo
- An Approximate Parallel Vectors Operator for Multiple Vector Fields* 315
Tim Gerrits, Christian Rössl, and Holger Theisel
- Core Lines in 3D Second-Order Tensor Fields* 327
Timo Oster, Christian Rössl, and Holger Theisel

Visual Analytics

- Track Xplorer: A System for Visual Analysis of Sensor-based Motor Activity Predictions* 339
Marco Cavallo and Çağatay Demiralp

TABLE OF CONTENTS

<i>ThreadReconstructor: Modeling Reply-Chains to Untangle Conversational Text through Visual Analytics</i>	351
Mennatallah El-Assady, Rita Sevastjanova, Daniel Keim, and Christopher Collins	
Biological Visualization	
<i>A General Illumination Model for Molecular Visualization</i>	367
Pedro Hermosilla Casajus, Pere-Pau Vázquez, Àlvar Vinacua, and Timo Ropinski	
<i>Analyzing Residue Surface Proximity to Interpret Molecular Dynamics</i>	379
Nils Lichtenberg, Raphael Menges, Vladimir Ageev, Ajay Abisheck Paul George, Pascal Heimer, Diana Imhof, and Kai Lawonn	
<i>Visual Analysis of Protein-ligand Interactions</i>	391
Pere-Pau Vázquez, Pedro Hermosilla Casajus, Victor Guallar, Jorge Estrada, and Àlvar Vinacua	
<i>DimSUM: Dimension and Scale Unifying Map for Visual Abstraction of DNA Origami Structures</i>	403
Haichao Miao, Elisa De Llano, Tobias Isenberg, Eduard Gröller, Ivan Barišić, and Ivan Viola	
VR and Workflows	
<i>VirtualDesk: A Comfortable and Efficient Immersive Information Visualization Approach</i>	415

Invited Talk: Keynote
Your Respiration Engines: Real-time Visualisations of Dynamic Molecular Landscapes

Drew Berry

Abstract

After 20 years of generating animations with slow, expensive rendering pipelines for movie production, WEHI.TV has switched to the extraordinary power of GPU hardware and accelerated game engines for generating vast, detailed molecular and membrane landscapes inside our living cells. Drew Berry will present the latest experiments producing cinematic movie sequences and real-time interactive '3D diorama' open-world scenes of mitochondria membranes and molecular engines that underlie the conversion of the food we eat into chemical energy for our cells. From 2017 WEHI.TV adopted and expanded upon the cellVIEW system to create a custom Maya to Unity pipeline that efficiently delivers real-time, multi-scale animated molecular worlds, to create interactive storytelling and meaningful experiences.

Short Biography

Drew Berry is a biomedical animator who creates beautiful, accurate visualisations of the dramatic cellular and molecular action that is going on inside our bodies. Beginning his career as a cell biologist, his raw materials are technical reports, research data and models from scientific journals. As an artist he works as a translator, from abstract and complicated scientific concepts into vivid and meaningful visual journeys. Since 1995 he has been a biomedical animator at the Walter and Eliza Hall Institute of Medical Research, Australia. His animations have exhibited at venues such as the Guggenheim Museum, Museum of Modern Art, the Royal Institute of Great Britain and the University of Geneva. In 2010 he received a MacArthur Fellowship "Genius Grant".

Invited Talk: Capstone Artistic Style Transfer Demystified

Daniel Sýkora

Abstract

Example-based style transfer became recently popular thanks to significant advances made by neural-based approaches as well as guided patch-based synthesis. The hype around deep neural networks is so intense that it makes many people believe neural-based techniques will soon replace traditional patch-based methods. However, the situation is not as optimistic as it might look like on the first sight. In this talk, we analyze in detail pros and cons of both directions and reveal fundamental limitations which might not be directly apparent. Those will lead us to an observation that a promising avenue for further investigation lies in a careful combination of both approaches. We demonstrate first promising attempts in this new direction.

Short Biography

Daniel Sýkora is an Associate Professor at the Department of Computer Graphics and Interaction, Faculty of Electrical Engineering, Czech Technical University in Prague where he also received his MS (2003) and Ph.D. (2007). He gained further research experience abroad at Trinity College Dublin, Walt Disney Animation Studios, and the University of Utah. Daniel's scientific career stems from his long-standing passion for traditional artistic techniques. He developed numerous algorithms that can eliminate repetitive and time-consuming tasks while still being able to preserve the uniqueness of handcrafted artwork and provide full creative freedom to the artist. Daniel and his team at CTU in Prague intensively cooperate with renowned industrial partners such as Adobe, Disney, or TVPaint Development. Some of the techniques they developed were already integrated into professional products and used in production. For his contribution, Daniel received numerous scientific awards including prestigious Günter Enderle Best Paper Award and The Neuron Award for Promising Young Scientists. More information about Daniel and his work can be found [here](#).
