

# Virtual Environments 2018

## ICAT - EGVE

28th International Conference on Artificial Reality and Telexistence  
23rd Eurographics Symposium on Virtual Environments

Limassol, Cyprus  
November 7 – 9, 2018

### Conference Co-Chairs

Despina Michael-Grigoriou (general chair)  
Cyprus University of Technology & RISE Research Centre, Cyprus

Sabine Coquillart, INRIA, France

Anthony Steed, University College London, UK & RISE Research Centre, Cyprus

Andreas Lanitis, Cyprus University of Technology & RISE Research Centre, Cyprus

### Program Co-Chairs

Gerd Bruder, University of Central Florida, USA

Shunsuke Yoshimoto, Osaka University, Japan

Sue Cobb, University of Nottingham, UK

### Proceedings Production Editor

Dieter Fellner (TU Darmstadt & Fraunhofer IGD, Germany)

Sponsored by EUROGRAPHICS Association

Dieter W. Fellner, Werner Hansmann, Werner Purgathofer, François Sillion  
Series Editors

## Table of Contents

Table of Contents .....	iii
Organizing Committee .....	vi
International Program Committee.....	vii
Author Index .....	viii
Keynotes .....	x
<b>Interfaces and Interaction</b>	
Positioning of Subtitles in Cinematic Virtual Reality .....	1
<i>Sylvia Rothe, Kim Tran, and Heinrich Hussmann</i>	
Analysis of Spatio-temporal Data in Virtual Historic Spaces .....	9
<i>Georgios Artopoulos and Panayiotis Charalambous</i>	
Effects of Embodiment on Generic and Content-Specific Intelligent Virtual Agents as Exhibition Guides .....	13
<i>Susanne Schmidt, Gerd Bruder, and Frank Steinicke</i>	
Invisible Long Arm Illusion: Illusory Body Ownership by Synchronous Movement of Hands and Feet .....	21
<i>Ryota Kondo, Sachiyo Ueda, Maki Sugimoto, Kouta Minamizawa, Masahiko Inami, and Michiteru Kitazaki</i>	
<b>Avatars and Movement</b>	
Safe Walking Zones: Visual Guidance for Redirected Walking in Confined Real-World Spaces .....	29
<i>Paul Lubos, Gerd Bruder, and Frank Steinicke</i>	
Verification of Necessity of Equivalent Gravity in Telexistence With Scale Conversion for Utilization of Humanoid Small Robot .....	37
<i>Kohei Matsumoto, Masahiro Furukawa, Kosuke Wada, Masataka Kurokawa, Hiroki Miyamoto, and Taro Maeda</i>	
Error Correction in Redirection: Rotational Manipulation for Natural Walking and Control of Walking Paths ..	45
<i>Junya Mizutani, Keigo Matsumoto, Ryohei Nagao, Takuji Narumi, Tomohiro Tanikawa, and Michitaka Hirose</i>	
Equivalent Physical Constant Hypothesis for Skill Transmission in Scale Conversion Telexistence .....	53
<i>Hiroki Miyamoto, Masahiro Furukawa, Kosuke Wada, Masataka Kurokawa, Kohei Matsumoto, and Taro Maeda</i>	
Individualized Calibration of Rotation Gain Thresholds for Redirected Walking .....	61
<i>Courtney Hutton, Shelby Ziccardi, Julio Medina, and Evan Suma Rosenberg</i>	

## Table of Contents

### Sensing and Rendering

- Adaptive Filtering of Physical-Virtual Artifacts for Synthetic Animatronics .....65  
*Ryan Schubert, Gerd Bruder, and Gregory Welch*
- A Novel Approach for Cooperative Motion Capture (COMOCAP) ..... 73  
*Gregory Welch, Tianren Wang, Gary Bishop, and Gerd Bruder*
- HTC Vive Pro Time Performance Benchmark for Scientific Research ..... 81  
*Morgan Le Chénéchal and Jonas Chatel-Goldman*
- Geometrical Algorithms for Real Time Sound Rendering Using Intelligent Prioritization .....85  
*Panagiotis Charalampous and Despina Michael-Grigoriou*
- Compression Of 16K Video For Mobile VR Playback Over 4K Streams .....95  
*Iker Vazquez and Steve Cutchin*

### Visual and Haptic Displays

- Materiality Manipulation by Light-Field Projection from Reflectance Analysis .....99  
*Kouki Murakami and Toshiyuki Amano*
- Soft Finger-tip Sensing Probe Based on Haptic Primary Colors .....107  
*Fumihiko Kato, Yasuyuki Inoue, and Susumu Tachi*
- Scalable Autostereoscopic Display with Temporal Division Method ..... 115  
*Tadatoshi Kurogi, Hideaki Nii, Roshan Lalintha Peiris, and Kouta Minamizawa*
- A Touch Panel for Presenting Softness with Visuo-Haptic Interaction .....123  
*Karen A. Murata, Erika Oishi, Takuto Nakamura, Hiroyuki Kajimoto, Nobuya Tanaka, Takahiro Sano, and Masayuki Naya*

### Clinical Applications

- A Scoping Review Exploring the Feasibility of Virtual Reality Technology Use with Individuals Living with Dementia ..... 131  
*Vienna Rose, Inga Stewart, Keith G. Jenkins, Chee Siang Ang, and Maria Matsangidou*
- Feasibility Study of an Augmented Reality System for People with Dementia ..... 141  
*Luis Duarte Andrade Ferreira, Sofia Cavaco, and Sergi Bermúdez*
- BuzzwireVR: An Immersive Game to Supplement Fine-Motor Movement Therapy ..... 149  
*Chris G. Christou, Despina Michael-Grigoriou, D. Sokratous, and M. Tsiakoulia*
- Virtual Reality Application for Blind People in Unknown Interior Spaces ..... 157  
*Nancy E. Guerrón, Antonio Cobo, and José J. Serrano Olmedo*

## Table of Contents

Studying Levels of Presence in a Virtual Environment Simulating Drug Use in Schools: Effect on Different Character Perspectives .....	163
<i>Maria Christofi, Evangelia Baka, Kalliopi-Evangelia Stavroulia, Despina Michael-Grigoriou, Andreas Lanitis, and Nadia Magnenat Thalmann</i>	
<b>Learning, Education and Collaboration</b>	
AR based Self-sports Learning System using Decayed Dynamic TimeWarping Algorithm .....	171
<i>Atsuki Ikeda, Dong Hyun Hwang, and Hideki Koike</i>	
A Study on AR Authoring using Mobile Devices for Educators .....	175
<i>Kinfung Chu, Weiquan Lu, Kiyoshi Oka, Kazuki Takashima, and Yoshifumi Kitamura</i>	
Blowing in the Wind: Increasing Copresence with a Virtual Human via Airflow Influence in Augmented Reality .....	183
<i>Kangsoo Kim, Gerd Bruder, and Gregory F. Welch</i>	
Usability of Augmented Reality in Aeronautic Maintenance, Repair and Overhaul .....	191
<i>Antoine Fischini, Fakhreddine Ababsa, and Mickaël Grasser</i>	
Virtual Fixtures in VR - Perceptual Overlays for Assisted Teleoperation, Teleprogramming and Learning .....	195
<i>Dennis Krupke, Jianwei Zhang, and Frank Steinicke</i>	

## Organizing Committee

## Keynote

### Self-Transformation Through Virtual Embodiment

*Mel Slater*

Event Lab, University of Barcelona, Spain

#### **Abstract**

In virtual reality you can look around wherever you like, and still of course see virtual reality. What happens when you look down towards yourself or in a virtual mirror? If it has been so programmed you will see a life-sized virtual body replacing your own. You are likely then to have the perceptual illusion that the virtual body is yours, even though you know for sure that it is not. In this talk I will show how this perceptual illusion can be used for various types of self-transformation. In particular I will concentrate on 'becoming someone else' and how this can be useful both for self-change and support resistance to the peer pressure.

#### **Short Biography**

Mel Slater DSc, is currently Distinguished Investigator at the University of Barcelona where he co-leads the Experimental Virtual Environments for Neuroscience and Technology (EVENT) Lab ([www.event-lab.org](http://www.event-lab.org)). He was Professor of Virtual Environments at UCL in the Department of Computer Science. He has been involved in research in virtual reality since the early 1990s, and has been first supervisor of 38 PhDs in graphics and virtual reality since 1989. In 2005 he was awarded the Virtual Reality Career Award by IEEE Virtual Reality 'In Recognition of Seminal Achievements in Engineering Virtual Reality.' He has been involved in and led several international projects in this field. He held a European Research Council (ERC) Advanced Grant TRAVERSE and two subsequent ERC Proof of Concept grants, and currently holds a new ERC Advanced grant MoTIVE. His publications can be seen on [publicationslist.org/mel Slater](http://publicationslist.org/mel Slater). He is co-founder and CSO of the company Virtual Bodyworks S.L. [www.virtualbodyworks.com](http://www.virtualbodyworks.com).

## Keynote

### The Increasing Importance of Virtual Worlds in Daily Life

*Nadia Magnenat Thalmann*

MIRALab, University of Geneva & Nanyang Technological University, Singapore

#### Abstract

The creation of virtual worlds has required during decades a lot of efforts and know how. First of all, the digitization or parametrization process has taken quite some years to allow the creation of 3D worlds. Then the animation of these 3D worlds is still an open research topics as well as their natural interaction. As ultimate goal, users aim to experience virtual fictive or realistic 3D worlds through 3D glasses and have the feeling of presence during the interaction.

Today, these virtual worlds are more and more used to create new reality that can be produced through 3D fabrication. With the use of real 3D models, their simulation, the interaction, we can test quantities of new worlds, games and situation. The addition to that is that we can immediately fabricate these virtual worlds and use the simulation software to manage their behaviour.

In this presentation, we will show how we are able to capture all kind of information, model it in 3D, simulate it, interact with it and finally develop real 3D models by fabricating them automatically for real worlds applications. We will show case studies with the fabrication of social robots.

#### Short Biography

Professor Nadia Magnenat Thalmann has pioneered research into virtual humans over the last 30 years. She obtained several Bachelor's and Master's degrees in various disciplines (Psychology, Biology and Biochemistry) and a PhD in Quantum Physics from the University of Geneva in 1977. From 1977 to 1989, she was a Professor at the University of Montreal in Canada and then Professor at the University of Geneva. Nadia Magnenat Thalmann is currently Professor and Director of the Institute for Media Innovation, Nanyang Technological University, Singapore. She is also the Founder and Director of the MIRALab, an interdisciplinary lab in Human Computer Animation, University of Geneva, Switzerland. Her global research area is the modelling and simulation of Virtual Humans. She is also working on Social Robots, mixed realities and medical simulation. All over her career, she has received many artistic and scientific Awards, among them the 2012 Humboldt Research Award, and two Doctor honoris Causa (from University of Hanover in Germany and from the University of Ottawa in Canada). She is Editor-in-Chief of the Journal *The Visual Computer* (Springer-Verlag) and is a Member of the Swiss Academy of Engineering Sciences.

## Keynote

### Using VR and AR Technology to Drive Engagement in Military History Museums

*Tracy Spaight*

Wargaming.net

#### **Abstract**

Over the past five years, video game developer and publisher Wargaming has developed several virtual reality and augmented reality experiences for military history museums around the world. We have used AR technology to bring museum exhibits out into public spaces (with the Dornier 17 project), made inaccessible areas of museums (such as the engine room of a destroyer) accessible through 360 VR, and allowed audiences to engage with historical vehicles in ways that simply aren't possible with real vehicles (like firing the main armament). Through our museum collaborations we have helped to solve some of the outstanding challenges faced by museums today, including how to reach 'digital natives', who grew up in a different media environment than baby boomers. This talk explores the challenges of integrating VR and AR technology into a museum setting, the kinds of engagement these technologies make possible, and the lessons we've learned along the way.

#### **Short Biography**

Tracy Spaight is the Director of Special Projects at Wargaming.net, a leading video game developer and publisher. Since 2012, he has developed interactive exhibits, 360 VR films, Augmented Reality Applications. Tracy's job is 'to do cool stuff.' Some of his recent projects include developing an AR experience for the 100 th anniversary of the Battle of Jutland for the National Museum of the Royal Navy, the SturmTiger AR project at the Bovington Tank Museum, and a commemorative flight of WW2 aircraft along the Alaska to Siberia air route - an event attended by the U.S. and Russian Ambassadors.

Tracy has worked in the video game industry as a publisher, game developer, and media project specialist since 2005. In that year, Tracy joined Atlanta based Rapid Reality Studios, where he served as VP of Research & Development and later as Chief Operating Officer. From 2008 through 2011, he was the Executive Director of Publishing at Gamersfirst, where he evaluated online games for licensing or acquisition.

Tracy has twice been a speaker at the State of Play conference at New York Law School, the BIART Conference in Russia, Gamelab in Spain, Digital Taipei, the Integrated Media Conference in Seattle, the Yorkshire Game Festival, and VR Connects in London in 2016 and 2017. He was the keynote speaker at the IEEE conference in Cyprus in 2015. Tracy is the author of 'Who Killed Miss Norway,' which first appeared in Salon, and the co-author of *Alter Ego: Avatars & Their Creators*.

Tracy holds a Bachelor of Arts degree in history from Santa Clara University and a Master of Arts degree in Science & Technology Studies at Cornell University. He was a visiting scholar in the History of Science at Cambridge University in 1998-1999. He has held fellowships from the Deutsche Akademische Austauschdienst, the National Science Foundation, and the Russell Sage Foundation, as well as media grants from the Texas Council for the Humanities and the Texas Commission for the Arts. Tracy is the co-founder and organizer of Cyberia, the 'coolest place on the playa' at Burning Man.
