Preface

The posters track of EuroVis called for late-breaking results, work in progress, and follow-up extensions, application case studies, or evaluations of existing methods. Each poster abstract was reviewed by two experts from the International Program Committee and one external reviewer. We followed a double-blind one-stage process, and had three reviews for each submission. After careful consideration of all reviews, the final acceptance was decided by the primary reviewer. This year, we accepted 26 out of 35 submissions for an acceptance rate of 74.3%. The posters are presented during the poster reception of the conference. We thank all authors for their hard work put into the submissions and all committee members and reviewers for their dedicated time and expertise.
